While we hope that your stay will be as relaxing as possible, we would ask that you take note of the following advice in Case of Emergency.

HOW TO SURVIVE A HOTEL FIRE

When you arrive:

- 1) After going into your room turn around and go back into the corridor to check the nearest EXIT
- 2) Get a good mental picture of your room and put your key in the same place every time, so as you know where it is.
- 3) Find out how to open your window. You may want to close it in case of emergency.
- 4) When you leave the room, close the door behind you, but do not lock yourself out. You may need to return.

GETTING OUT IF THERE IS A FIRE

- 1) If you wake up with smoke in your room, grab the key and head for the door on your hands & knees.
- 2) Check the temperature of the door, by placing the back of your hand (not the palm of your hand) against the door. If the door is hot, do NOT open it. If not, slowly open it and assess the conditions outside.
- 3) Still on hands and knees, crawl to the EXIT keeping to the side of the corridor.
- 4) When you begin to descend stairs, WALK down (please do not run) and hold onto the handrails tightly as you go. UNDER NO CIRCUMSTANCES SHOULD YOU USE THE LIFT.
- 5) If going towards the roof, hold onto the handrails tightly otherwise people running down will knock you over.
- 6) When you reach the roof prop the door open and position yourself on the windward side of the building.

IF YOU ARE FORCED TO STAY IN YOUR ROOM

- 1) Phone Reception (Dial 0) for help and put a wet towel around your nose and mouth.
- 2) If there is fresh air outside leave the windows open to vent out the smoke in your room.
- 3) Switch on bathroom vent (if installed) and fill the bath (if applicable) with water.
- 4) With your metal bin, bail water from the bath onto the door to keep it cool.
- 5) Wet some sheets or towels and stuff the cracks of your door to keep out the smoke.
